SUMMARY

AI Engineer specializing in NLP and LLM-based systems, with hands-on experience building AI-driven applications using FastAPI, Hugging Face, and OpenAI APIs. Currently pursuing a Master's in Artificial Intelligence, with a strong foundation in Python, machine learning, and data processing. Experienced in prompt engineering and backend development for AI-powered applications. Published IEEE researcher focused on developing explainable, production-oriented AI systems that bridge research and real-world applications.

TECHNICAL SKILLS

Machine Learning & AI:

- PyTorch, TensorFlow, Transformers, mBERT, Hugging Face, supervised learning, model fine-tuning, inference pipelines.

LLMs & Generative AI:

- OpenAI API, Gemini API, prompt engineering, prompt optimization, conversational AI systems, RAG concepts, context handling, LLM integration.

Backend & AI APIs

- FastAPI, Pydantic, REST API development, AI service integration, backend development for AI applications.

Data Analysis & Visualization:

- NumPy, Pandas, Matplotlib, Seaborn, data preprocessing.

Databases:

- SQL, PostgreSQL, database design.

Computer Vision:

- OpenCV, Pillow, image processing basics.

Tools & Deployment:

- Git, GitHub, Docker, API testing, environment management.

TECHNICAL PROJECTS

SparkVision AI Agent - Real-Time Child Digital Eye-Strain Detection IEEE Publication | 2025 | [Link](#)

- Built real-time CNN + rule-based system for eye-strain detection (98.82% accuracy)

Early prediction of kidney dysfunction in diabetes patients IEEE Publication | 2025 | [Link](#)

- Built ML models (KNN, Random Forest) for early prediction using clinical features (~98% accuracy)
- Applied preprocessing and threshold-based labeling on 499 samples (13 features)

Arabic Voice Assistant – AL NAYZAK | 2026 | [Link](#)

- Built a real-time Arabic voice assistant with WebSocket streaming, VAD, and STT/LLM/TTS pipeline
- Deployed full-stack on Hugging Face Spaces using Docker with 24/7 uptime monitoring
- Integrated Google Gemini 2.5 Flash with a PDF knowledge base for domain-specific Arabic Q&A

Madar | 2026 | [Link](#)

- Developing an AI-supported SaaS platform using React, FastAPI, and Supabase, with a focus on backend API development and database integration.
- Built REST API workflows connecting frontend features with backend services and Supabase data storage.
- Supported product development through prompt engineering, AI-assisted prototyping, and rapid frontend iteration.

Phishing Detection Ensemble (Logistic Regression + Char-CNN) | 2026

- Built hybrid ML/DL model achieving 0.9857 ROC-AUC (test)
- Trained Char-CNN with early stopping, reaching ~0.9936 validation ROC-AUC

LLM-Powered Conversational AI System

- Built GPT-based chatbot using OpenAI API + FastAPI with multi-turn context handling
- Containerized with Docker and structured APIs using Pydantic

Multilingual Toxicity Dataset for Arabic–English–Arabizi Text

- Built large-scale Arabic–English–Arabizi dataset with span-level annotations for NLP tasks

Transliteration-Aware Toxicity Detection (NLP)

- Built multilingual NLP pipeline (mBERT + XGBoost) for Arabic–English–Arabizi toxicity detection (>0.99 F1)
- Designed transliteration-aware preprocessing and integrated SHAP/LIME for explainability

Ibtikar | [Link](#)

- Built mBERT-based mobile app for toxicity detection on social media (>99% accuracy)

CerebroX – Automated Data Pipeline & EDA Platform | [Link](#)

- Built an automated data analysis platform for CSV/XLSX ingestion, data cleaning, preprocessing, exploratory data analysis, and visualization.
- Developed a multi-page desktop GUI with dedicated flows for data loading, preparation, EDA, AI-assisted analysis, plotting, and user navigation.
- Integrated SQL/database functionality for dataset storage, querying, and downstream analysis workflows.

Rule-Based Arabizi-to-Arabic NLP Engine

- Built rule-based system for Arabizi → Arabic conversion using linguistic patterns

B-WEF V1.2 – Survey Analytics and Profiling Pipeline

- Built a Python pipeline for survey data cleaning, Google Sheets/CSV ingestion, and qualitative/quantitative data separation.
- Implemented reliability analysis, composite scoring, consistency checks, and automated reporting using Pandas, NumPy, SciPy, and scikit-learn.
- Developed visualizations and clustering outputs to generate respondent profiles and work-environment fit insights.

EDUCATION

Data Analyst | Bootcamp at Spark x Udacity – Palestine 1-2-2025 | 2-6 -2025

- Pursuing an intensive data science scholarship focused on Python (NumPy, Pandas), data visualization (Matplotlib), and machine learning, with hands-on projects, expert mentorship, and career coaching.

Quality Assurance and software testing | Bootcamp at AXSOS Academy | Palestine 1-10-2024 | 1-2-2025

- Completed a 16-week, 500-hour QA bootcamp, focusing on Manual Testing, Back-end Testing, Automation, Mobile Testing, and advanced automation techniques, hands-on project and team work dynamics.

Arabic American University | Master, Artificial Intelligence | Ramallah, Palestine. 1-10-2024 | Present
Birzeit University | Bachelor, Mechatronics Engineering| Birzeit, Palestine. 1-10-2018 | 1-2-2024
Introduction to Machine learning | 40 hours training| Birzeit university, Palestine. 1-5-2022 | 1-7-2022

PROFESSIONAL EXPERIENCE

Quality assurance engineer | Pal-Swiss Tech Hubs | Ramallah 1-3-2025 | 30-10-2025

- Automated data validation pipelines using Python and SQL to ensure data integrity across systems
- Built and maintained automated testing workflows (Cypress), reducing manual QA effort by 50%
- Analyzed backend data using SQL to validate system outputs and detect inconsistencies
- Contributed to improving system reliability through structured testing and data-driven validation

MEAL and Project Coordinator | Al-Nayzak | Ramallah 1-11-2025 – 31-5-2026

- Applied machine learning models (Logistic Regression, Neural Networks) to analyze program performance and predict risks
- Built Python-based data pipelines for data cleaning, preprocessing, and analysis
- Conducted clustering and statistical analysis to segment performance metrics and identify optimization opportunities
- Generated data-driven insights to support decision-making and operational improvements

AI & Data Science Instructor & Content Developer | Digital Academy of Al Nazyal 1-2-2026 – 31-6-2026

- Delivered 300+ hours of training in Data Science, Machine Learning, and Generative AI
- Taught Python, SQL, and ML concepts including neural networks and LLMs
- Designed hands-on projects covering real-world ML and AI applications
- Developed curriculum and training

Prompt Engineering Intern | DataQueue 1-6-2026 - Present

- Supporting the design, testing, and refinement of prompts for LLM-based applications and AI workflows.
- Assisting in evaluating AI outputs for accuracy, clarity, relevance, and consistency.

- Collaborating with the team to improve prompt templates, document results, and support AI feature development.

Lead of AI & Data Analysis | Burhan

2-2026 - Present

- Leading AI and data analysis efforts to support data-driven career and hiring decisions for the Arab world.
- Designing and analyzing AI-powered workflows that transform career and recruitment data into clear, evidence-based insights.
- Collaborating on the development of tools and models that help users move from guesswork to informed professional decisions.
