From: Palestine

Professional Summary:

Computer Science Graduate from Al-Quds University with hands-on experience in AI-driven medical imaging and backend development. Built a brain tumor detection system using nnU-Net achieving 80%+ Dice score, and developed scalable APIs with FastAPI. Strong in Python, PyTorch, and system-level problem solving. Currently expanding into networking and security through CCNA certification.

Education:

Bachelor of Science in Computer Science - Al-Quds University

Graduated: 2025

Exchange Semester - Hochschule für Technik und Wirtschaft des Saarlandes (HTW Saar), Germany

April 2023 - July 2023

- Completed an exchange semester in Germany focused on computer engineering and technical project development, including collaboration with HYDAC International on a hydrogen storage system project (SRS, P&ID, feasibility analysis).

Skills:

Programming Languages:

- Python, Java, JavaScript, SQL, PHP, C, C++, C#, Assembly, Bash

Artificial Intelligence & Data:

- PyTorch, nnU-Net, NumPy, NiBabel
- Machine Learning, Deep Learning, Computer Vision
- Medical Image Processing (MRI, segmentation)

Backend & Software Development:

- FastAPI, Flask, REST API Design
- PyQt (Desktop Applications Development)

Tools & Platforms:

- Git/GitHub, Linux (Ubuntu, Debian), VirtualBox, Wireshark
- MySQL, SQLite, VS Code, Cisco Packet Tracer

Systems & Hardware:

- Arduino Programming, NAS Server Setup (RAID, Networking, Remote Access)

Networking:

- CCNA (In Progress)
- Routing & Switching, Subnetting, Network Fundamentals, VLANs

Languages:

- Arabic: Native
- English: C1 (Fluent)
- German: A2 (Beginner)

Projects:

MRI Brain Tumor Detection System

- Built an AI-powered system using the U-Net architecture to segment, classify, and localize brain tumors from 3D NIfTI MRI scans, and generate a detailed PDF report.

- Achieved an 80.55% Dice Score and a 70.47% IoU (low false positives/negatives) by training on the BraTS2020 dataset with an 80/20 split.
- Led the end-to-end pipeline: data preprocessing, segmentation, classification, and result visualization.
- Technologies: Python, PyTorch, nnU-Net, Jupyter Notebook, NiBabel.

Autonomous Car – HTW Saar:

- Collaborated with a team of five to design and build a small-scale autonomous car.
- Implemented techniques for basic obstacle detection and autonomous navigation.
- Technologies: Raspberry Pi, LIDAR, Python, and 3D modeling.

Liquid Hydrogen Tank Storage System Research - Hydac International

- Collaborated with a multidisciplinary team of exchange students to create an SRS, P&ID, and market research for a liquid hydrogen tank storage system.
- Conducted technical analysis, feasibility assessment, and coordinated documentation.
- Tools: SRS tools, market research, teamwork platforms.

Home NAS Server Build

- Designed and assembled a personal NAS server for data backup and file sharing.
- Configured RAID, networking, and system monitoring.
- Technologies: Linux, VirtualBox, TrueNAS, RAID, OpenVPN.

Certifications:

Cisco Certified Network Associate (CCNA) - In Progress

- CCNA: Introduction to Networks - Completed
- CCNA: Switching, Routing, and Wireless Essentials - Completed
- CCNA: Enterprise Networking, Security, and Automation - Completed
