SUMMARY

AI Engineer specializing in NLP and LLM-based systems, with hands-on experience building AI-driven applications using FastAPI, Hugging Face, and OpenAI APIs. Currently pursuing a Master's in Artificial Intelligence, with a strong foundation in Python, machine learning, and data processing. Experienced in prompt engineering and backend development for AI-powered applications. Published IEEE researcher focused on developing explainable, production-oriented AI systems that bridge research and real-world applications.

TECHNICAL SKILLS

Machine Learning & AI:

- PyTorch, TensorFlow, Transformers, mBERT, Hugging Face, supervised learning, model fine-tuning, inference pipelines.

LLMs & Generative AI:

- OpenAI API, Gemini API, prompt engineering, prompt optimization, conversational AI systems, RAG concepts, context handling, LLM integration.

Backend & AI APIs

- FastAPI, Pydantic, REST API development, AI service integration, backend development for AI applications.

Data Analysis & Visualization:

- NumPy, Pandas, Matplotlib, Seaborn, data preprocessing.

Databases:

- SQL, PostgreSQL, database design.

Computer Vision:

- OpenCV, Pillow, image processing basics.

Tools & Deployment:

- Git, GitHub, Docker, API testing, environment management.

TECHNICAL PROJECTS

SparkVision AI Agent - Real-Time Child Digital Eye-Strain Detection IEEE Publication | 2025 | [Link](#)

- Built real-time CNN + rule-based system for eye-strain detection (98.82% accuracy)

Early prediction of kidney dysfunction in diabetes patients IEEE Publication | 2025 | [Link](#)

- Built KNN and Random Forest models for early prediction using preprocessed clinical data from 499 samples with 13 features, including threshold-based labeling, achieving approximately 98% accuracy.

Arabic Voice Assistant – AL NAYZAK | 2026 | [Link](#)

- Built and deployed a real-time Arabic voice assistant with WebSocket streaming, VAD, STT/LLM/TTS pipeline, Gemini 2.5 Flash PDF Q&A, Docker, and 24/7 monitoring on Hugging Face Spaces.

Madar | 2026 | [Link](#)

- Developing Madar, an AI-powered adaptive business management platform that helps organizations replace paper-based processes with clear, connected digital workflows.
- Built core digital workflow features for managing users, tracking requests, storing records, and organizing approvals, turning manual processes into faster, smarter, and more flexible systems tailored to organizational needs.

Dangerous URL Detection Hybrid System | 2026

- Built a hybrid ML/DL URL threat detection system using XGBoost, BiGRU/Dual models, and rule-based guardrails to classify malicious URLs and improve real-world reliability.

Multilingual Arabic–English–Arabizi Toxicity Detection

- Built a span-annotated Arabic–English–Arabizi toxicity dataset and transliteration-aware NLP pipeline using mBERT + XGBoost, achieving >0.99 F1 with SHAP/LIME explainability.

CerebroX – Automated Data Pipeline & EDA Platform | [Link](#)

- Built an automated data analysis platform for CSV/XLSX ingestion, cleaning, preprocessing, EDA, visualization, and AI-assisted analysis.
- Developed a multi-page desktop GUI with SQL/database support for dataset storage, querying, and analysis workflows.

EDUCATION

Data Analyst | Bootcamp at Spark x Udacity – Palestine

1-2-2025 | 2-6-2025

- Pursuing an intensive data science scholarship focused on Python (NumPy, Pandas), data visualization (Matplotlib), and machine learning, with hands-on projects, expert mentorship, and career coaching.

Quality Assurance and software testing | Bootcamp at AXSOS Academy | Palestine 1-10-2024 | 1-2-2025

- Completed a 16-week, 500-hour QA bootcamp, focusing on Manual Testing, Back-end Testing, Automation, Mobile Testing, and advanced automation techniques, hands-on project and team work dynamics.

Arabic American University | Master, Artificial Intelligence | Ramallah, Palestine. 1-10-2024 | Present

Birzeit University | Bachelor, Mechatronics Engineering| Birzeit, Palestine. 1-10-2018 | 1-2-2024

Introduction to Machine learning | 40 hours training| Birzeit university, Palestine. 1-5-2022 | 1-7-2022

PROFESSIONAL EXPERIENCE

Quality assurance engineer | Pal-Swiss Tech Hubs | Ramallah 1-3-2025 | 30-10-2025

- Automated data validation pipelines using Python and SQL to ensure data integrity across systems
- Built and maintained automated testing workflows (Cypress), reducing manual QA effort by 50%
- Analyzed backend data using SQL to validate system outputs and detect inconsistencies
- Contributed to improving system reliability through structured testing and data-driven validation

MEAL and Project Coordinator | Al-Nayzak | Ramallah 1-11-2025 – 31-5-2026

- Applied machine learning models (Logistic Regression, Neural Networks) to analyze program performance and predict risks
- Built Python-based data pipelines for data cleaning, preprocessing, and analysis
- Conducted clustering and statistical analysis to segment performance metrics and identify optimization opportunities
- Generated data-driven insights to support decision-making and operational improvements

AI & Data Science Instructor & Content Developer | Digital Academy of Al Nazyal 1-2-2026 – 31-6-2026

- Delivered 300+ hours of training in Data Science, Machine Learning, and Generative AI
- Taught Python, SQL, and ML concepts including neural networks and LLMs
- Designed hands-on projects covering real-world ML and AI applications
- Developed curriculum and training

Prompt Engineering Intern | DataQueue 1-6-2026 - Present

- Supporting the design, testing, and refinement of prompts for LLM-based applications and AI workflows.
- Assisting in evaluating AI outputs for accuracy, clarity, relevance, and consistency.
- Collaborating with the team to improve prompt templates, document results, and support AI feature development.

Lead of AI & Data Analysis | Burhan 2-2026 - Present

- Leading AI and data analysis efforts to support data-driven career and hiring decisions for the Arab world.
- Designing and analyzing AI-powered workflows that transform career and recruitment data into clear, evidence-based insights.
- Collaborating on the development of tools and models that help users move from guesswork to informed professional decisions
